*TS007 guidelines:

This cylinder offers resistance to many types of attack. It is designed to be used in conjunction with two-star security door hardware to ensure enhanced resistance to all commonly used attack methods. Therefore, this product **MUST** be used in conjunction with two-star security door hardware meeting TS 007 to ensure security. Such hardware can be recognised by the two-star marking which may either be visible from the outside on an installed handle or, failing this, will be visible once the outside handle has been removed. Security hardware can be of several types, including a handle with a reinforced backplate, an escutcheon or a device which is concealed behind the handle backplate. In all cases, the purpose is to protect your cylinder from force attack.

Compatible 2 Star Hardware

The ProSecure door handle and SupaSecure Pull Escutcheon have been tested to TS007-1:2014+A2:2018 and have achieved BSI 2 star Kitemark. Use with a TS007 1 star cylinder to achieve 3 star rating.
